

TEAYS VALLEY LSD

Energy Project

Ashville, OH

Contract Amount: \$ 1,993,206

1st Year Guaranteed Energy Savings: \$253,014

1st Year Actual Energy Savings: \$278,241

Project Duration: 9 months

Completion Year: 2016

Digital Services Utilized:

Orchestrate
Automation Composer
Facility Conductor

“The school district began saving energy right after the project started. In fact, within the past six months Teays Valley recouped a savings of \$91,000 in utilities alone.” Perdue also praised the Veregy Team, “It was extremely easy to work with your team and contractors, throughout this project.”

- Brett Perdue,
Facilities Director

PROJECT OVERVIEW

Veregy designed and implemented a guaranteed energy savings program for Teays Valley Local Schools which included a non-proprietary Building Automation System, LED Lighting and the programming of dehumidification sequences in 5 Gyms. In addition to lower energy and maintenance costs, this project resolved various issues the District was experiencing in their facilities. Later, Veregy was engaged for additional projects such as the 2018 LED Lighting Project at Ashville ES, Scioto ES & Walnut ES and the 2019 LED Lighting Project at the High School, AG Building & Stadium. For the 2018 and 2019 LED Lighting Projects, the District qualified for a total of \$140,000 in Incentives from South Central Power. Recently, Veregy provided a turn-key solution for the construction of their new 40,000 Sq. Ft. Fieldhouse.

PROJECT HIGHLIGHTS

- Modernized Building Automation System in 8 Buildings
- Integration of VAV Controls at 8 buildings
- LED Lighting 9 Gyms
- Programmed Dehumidification Sequences in 5 Gyms
- Virtual Temperature Control App
- Virtual Maintenance and Technical Services
- Multiple facility management integrations via Orchestrate including event scheduling.
