Acres of US forest in one year

DECARBONIZATION

PROJECT OVERVIEW

Veregy worked together with Borden-Henryville School Corporation to design and install a beneficial roof mounted solar array project. Also, LED lighting was incorporated into Borden K-12 and Henryville K-12 Schools. Veregy currently utilizes remote monitoring and demand management technology to ensure a productive and stable system, while performing routine maintenance to the solar arrays. With a combination of solar servicing and demand management, Veregy will help Borden-Henryville stabilize one of the most variable items in its budgets – the cost of energy.

PROJECT HIGHLIGHTS

- LED Lighting
- Roof Mounted Solar Array
- Solar Maintenance
- Remote Monitoring
