Trash bags of waste recycled instead of landfilled

2,293

Acres of US forest in one year

DECARBONIZATION

PROJECT OVERVIEW

Veregy collaborated with the City of North Vernon to design and install a Guaranteed Energy Savings Project with the goal of a net zero electric bill. Veregy helped the City of North Vernon become Indiana's first "Solar City" with 3,900 solar panels, equal to 2.38MW, across 22 different sites throughout the city including the wastewater treatment plant. Veregy currently utilizes remote monitoring and demand management technology to ensure a productive and stable system, while performing routine maintenance to the solar arrays when necessary. With a combination of solar servicing and demand management, Veregy will help the City of North Vernon stabilize one of the most variable items in its budgets – the cost of energy – and achieve a net zero electric bill.

PROJECT HIGHLIGHTS

- Ground & Roof Mounted Solar Array
- Solar Installation at 22 sites
- LED Street Lighting
- Solar Maintenance Contract
- Demand Management
- Remote Monitoring
- Start Date: January 2018
- Completion Date: January 2019
- Contract Amount: \$5,036,000
- Annual Savings: \$316,895
- Annual Project Energy Savings: 2,640,815 kWh
