Miles driven by an average passenger vehicle

30,935

Trash bags of waste recycled instead of landfilled

846

Acres of US forest in one year

DECARBONIZATION

## PROJECT OVERVIEW

Monroe County Community School Corporation utilized parking lot space by installing 660kW of solar powered car canopies to generate more power to offset utility costs, while also providing sheltered parking for the school's electric transportation buses. Along with the car canopies, Veregy installed 235kW of roof mounted solar arrays on two separate buildings. Veregy will also install 20 Delta DC City Bus Chargers: Stand-alone, 2-port simultaneous Level 3 50-kW output to charge 40 of Monroe County Community School Corporation's transportation buses. With the installation of this forward-thinking project, Monroe County Community School Corporation displayed their dedication and commitment to becoming a more sustainable facility and a leading example for other school districts nationwide.

## PROJECT HIGHLIGHTS

- Solar Bus Canopy Array
- Largest K-12 fleet of EV Buses in Indiana
- Solar Maintenance and Remote Monitoring
- EV Charger Installation (20 Chargers)
- EV Charger Maintenance
- Project Start Date: March 2023
- Project Completion: October 2023
