4,390

Miles driven by an average passenger vehicle

7,383

Trash bags of waste recycled instead of landfilled

5,436

Acres of US forest in one year

DECARBONIZATION

PROJECT OVERVIEW

In January 2007, Veregy was selected through a competitive Request for Proposal process to be Spoon River College's Life Cycle Infrastructure Program Manager. Over the next three months Veregy completed an Infrastructure and Energy Assessment of the campus facilities which culminated into a new Facilities Master Plan for the college. Veregy has dealt with the demands of running a community college covering five counties and creating new educational opportunities for their students. Spoon River College is proud of their 50-year history and looks forward to a successful future with greatly improved learning environments and modernized facilities.
